OHIO FARM INCOME

Cash receipts from Ohio livestock, livestock products and crops totaled \$4.48 billion in 1994, about 0.3 percent less than the record high established in 1993. Cash receipts from livestock in 1994 were lower than in 1993 by 5.0 percent but crop cash receipts were higher by 2.2 percent.

In 1994 livestock and livestock products earned \$1.58 billion in cash receipts, the ninth largest amount ever recorded in this category. However, this was down 12.7 percent from 1990 which was the record high for livestock. The percentage of total cash receipts earned by livestock and livestock products was 35.2 percent. The last time livestock earned more than half of all cash receipts was in 1972. In 1980 livestock earned just under a third of all cash receipts.

Cash receipts from crops, at \$2.90 billion for 1994, were the largest amount earned by crops ever recorded in this category. It was up 2.2 percent from 1993 which was the previous record high for crops. The percentage of total cash receipts attributable to crops in 1994 was 64.8 percent. In 1980 crops earned two third of total cash receipts.

Government payment totaled \$117.1 million, were the lowest since 1982. It was 55.9 percent lower than last year and 72.9 percent less than the record high, \$431.9 million paid out in 1987. This represents 2.5 percent of all cash income and 10.0 percent of net farm income after inventory adjustment. In 1987 the record high government payments accounted for 54 percent of net farm income.

Gross farm income for 1994, at \$5.42 billion, was up 6.5 percent than in 1993. However, total production expenses increased to reach \$4.25 billion.

The top five commodity groups in 1994 in terms of cash receipts earned were, respectively: soybeans with \$1,028.6 million and 23 percent of total receipts; corn \$801 million and 17.9 percent of total; milk \$597.8 million, 13.4 percent; greenhouse & nursery products, \$483.4 million, 10.8 percent; poultry and eggs, \$350.2 million, 7.8 percent of total cash receipts. Among all commodities, Soybeans moved up one rank, while corn lost its position, milk, and greenhouse and nursery retained number three and four positions, respectively. Poultry and eggs edged out cattle and calves moving up to the fifth place. The other five commodities ranked from sixth to tenth places were respectively: cattle and calves, hogs, wheat, vegetables and all hay. These top ten commodities accounted for 94.9 percent of all cash receipts.

County rankings based on total cash receipts produced some changes comparing 1994 with 1993. Darke, Mercer, Wayne, Licking, Lake, Clark, Putnam, Holmes, Fulton. Auglaize were ranked the first through tenth places respectively. Wayne county retained the lead in milk, cattle and calves, and oats and hays from 1993 to 1994. Darke held onto the first position in hogs, Poultry and other livestock, corn and soybeans. Wood retained the first place for wheat, while Lake county retained the first place in other crops.

NET CASH INCOME	1,305.3	1,560.0	1,376.9	58,093.2	49,761.5
Number of Farms (number)	78,000	76,000	75,000	2,083,430	2,064,720

1/ Value added to gross income. Value added to net farm income equals difference in net farm income and returns to operators.

2/ Statistics in and above the Net Farm Income line represent the farm sector, defined as including farm operators' dwellings located on farms. Statistics below the Net Farm Income line represent only the farm business to the exclusion of the operators' dwellings. 3/ Includes landlord capital consumption. 4/ Returns to operators is equivalent to net farm income excluding the income, and expenses associated with farm operators' dwellings. 5/ Excludes landlord capital consumption.

1/ Includes broilers, farm chickens, chicken eggs, turkeys, sheep, wool, turkeys eggs, beeswax, honey, other poultry and other livestock. 2/ Includes greenhouse and nursery and ornamentals, fresh market, processing and greenhouse vegetables, potatoes, fruits and nuts, berries, rye, tobacco, seed crops, mushrooms, popcorn, and miscellaneous crops.

PROCEDURE

Ohio estimates of cash receipts from farm marketings were published initially in 1927 and annually since 1929. These county estimates of cash receipts are published by the Department of Agricultural Economics and Rural Sociology of the Ohio State University and the Ohio Agricultural Research and Development Center in cooperation with the National Agricultural Statistics Service of the United States Department of Agriculture. This bulletin contains 1994 Ohio county and state cash receipts estimates and revised 1991-1993 State estimates. County production and inventory estimates of various commodities are published annually in the Ohio Agricultural Statistics bulletin.

Current cash receipts from farm marketings of farm products represent calendar year gross receipts from commercial market sales as well as loans (net of redemptions) made or guaranteed by CCC and purchases under price support programs. The value of home consumption and production expenses is excluded. County estimates of cash receipts from farm marketings are derived by allocating State estimates to counties on the basis of crop and livestock production and Census marketings by Agricultural Statistics Districts. Check data such as county dairy production from the milk market administrators are also used.

The definition of a farm includes a place which has annual sales of agricultural products of \$1,000 or more. This definition has been used since the 1974 Census of Agriculture. The average cash receipts per farm will aid in the comparison of counties with similar farm practices better than a comparison of total cash receipts.

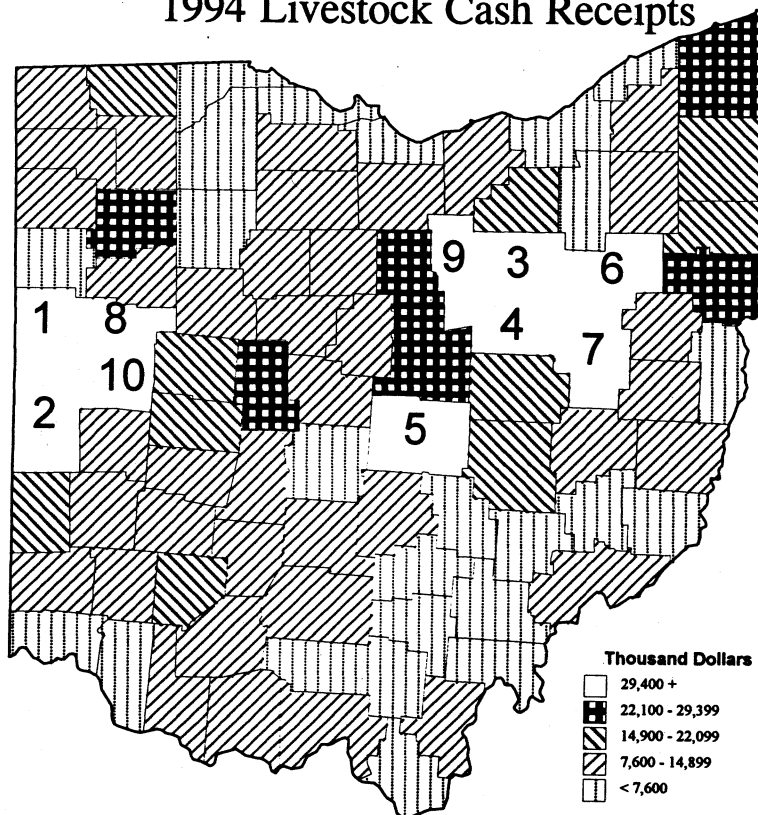

This bulletin has been prepared through the efforts of many people, including personnel of agricultural agencies throughout Ohio. The greatest recognition is due to the large number of Ohio farmers and agri-businessmen for their interest and help in providing the basic data used in compiling this information.
